Thank you for addressing these questions Alyssa. I can confirm that Chumash Village (HCD: 40-0166), located at 3057 South Higuera St in San Luis Obispo is not within spaces that would be converted by the Mobilehome Park Utility Conversion Program before 2030. If the Program does continue through an extension, it would still be most likely several years past 2030 before Chumash Village would be contacted for pre-planning.

Sincerely,

Good Afternoon Duane,

I apologize for the delayed response on this. I was waiting for the Priority Lists to be finalized and the formal notifications letters to go out before responding. You will soon be receiving a letter stating that Chumash Village has been chosen for conversion within the next phase of this program. Due to the evidence you provided to SED with your last application, Chumash Village was prioritized to the top of the list, and the utilities were instructed to contact the top priorities as soon as practicable without disrupting the projects that have already started. I cannot guarantee any type of timeline since the utilities are responsible for their own construction schedule, but I anticipate you should hear from the utilities within the next 6 months regarding the conversion.

Sincerely,

Jason R. McMillan, P.E. (he/him)
