* All trees acceptable to the conditions at Chumash village are not listed. Trees should have a mature height under 30'±. Some of the taller trees listed are slow growing and may not reach their maximum mature height. Many trees can have their height controlled by pruning. However a tree with a 50' mature height should not be planted with the idea of using pruning to keep it under control. Sunset Western Garden Book can be used as a reference for more information on the above trees.

Trees Unacceptable for Use in Chumash Village**
